Space Age Radio

A series of special programs covering topics geared to the space age has been scheduled over Station WNTC.

Under the title, Report from Republic, the series is a continuation of similar programs broadcast last year featuring leading engineers and scientists on the staff of Republic Aviation Corporation's new Research and Development Center, Long Island, New York.

The new series will include four programs, devoted to the following topics: Problems of Re-entry, the Physiological and Psychological Problems of Space Travel, Optimum Lunar Trajectories, and Opportunities in Space Age Engineering.

The first program in the series will be heard on WNTC at 6:45 EST, starting this coming Monday, March 13, 1961.
